

COMMUNITY EVENT IN ANGLE

Local residents are invited to attend a drop-in event at Angle Village Hall on Wednesday 7 February to hear about Floventis Energy's plans to develop a floating wind farm in the Celtic Sea. Representatives from Floventis will be available from 14.00 to 18.00 hrs.

Llŷr 1 is expected to power just over 100,000 homes with clean, green energy. At its closest point, it will be approximately 36 km from the Welsh coastline, 55km from Lundy Island and 72km from the Devon coastline.

Public consultation on Llŷr 1 started on Monday 15 January and will run to Sunday 11 February 2024. A virtual exhibition is available at <https://llyr1.consultation.ai>. All feedback must be received by 23.59 hrs on Sunday 11 February 2024.

Floventis Energy then expects to submit an application for consent to construct and operate an offshore generating station, with deemed planning permission for onshore works, under Section 36 of the Electricity Act 1989. This process is managed by Planning and Environmental Decisions Wales on behalf of Welsh Ministers. In parallel, a Marine Licence will be applied for which is consented under Part 4 of the Marine and Coastal Access Act 2009. The Marine Licence is administered by Natural Resources Wales Marine Licensing Team. This will allow the developer to build and operate Llŷr1. Construction is expected to begin in late 2026 subject to the necessary consents.

Please do come along to find out more and ask any questions that you might have. You can also find further information at www.llyrwind.com
